

CoinDiff Privacy Policy

This Privacy Policy describes how CoinDiff collects, uses, and protects user data.

Information We Collect

- Email address (for authentication)
- User ID (generated by Firebase)
- Limited device information (used by Firebase services)

How We Use Data

We use collected data to provide core app functionality, including authentication and maintaining user preferences.

Data Sharing

We use third-party services such as Firebase. These services may process user data to provide authentication and backend functionality.

Data Security

All data is transmitted securely using encryption (HTTPS).

User Rights

Users can request account deletion by contacting the developer via email.
